

MOHAMMAD ALI

Senior Front-End Developer | SaaS & Lead Generation Specialist

Chiniot, Pakistan • 📞 +92 3157324013 • ✉ alich70566@gmail.com

PROFESSIONAL SUMMARY

A highly skilled and results-driven Senior Front-End Developer with 4+ years of experience architecting, building, and scaling complex SaaS platforms and high-performance web applications. Deep expertise in React, Angular, TypeScript, and modern UI ecosystems including Tailwind CSS, Bootstrap, and GSAP. Proven track record of delivering scalable lead-generation platforms, integrating REST APIs, and optimizing frontend performance. Git-based team collaboration, and leveraging AI tools to accelerate development velocity. Passionate about clean, maintainable code and seamless user experiences in fast-paced international environments.

TECHNICAL SKILLS

Frontend UI & Styling	HTML5, CSS3, JavaScript (ES6+), React, Angular, TypeScript., Bootstrap, Tailwind CSS, Material UI, GSAP Animations, Responsive Design
Tools & DevOps Best Practices	Git, GitHub, Webpack, Vite, npm SaaS Architecture, Web Accessibility, SEO, Performance Optimization

PROFESSIONAL EXPERIENCE

Senior Front-End Developer

March 2023– Present

Rdeens Technologies | Chiniot, Pakistan

- frontend architecture for the official corporate SaaS platform using React, Angular and Bootstrap, establishing a scalable, component-driven codebase and strong online brand identity.
- Integrated multiple REST APIs to deliver dynamic, data-driven features and improved real-time.
- Implemented GSAP animations and performance optimizations (lazy loading, code splitting) resulting in significantly improved user engagement and faster page loads.
- Collaborated with design and backend teams using GitHub workflows, ensuring clean version control, code reviews, and timely feature delivery.
- Applied SEO best practices and web accessibility standards across all product surfaces to maximize organic reach.

Front-End Developer

July 2022– Feb 2023

Digiweb Technologies | Chiniot, Pakistan

- Developed and maintained responsive user interfaces for enterprise-level applications using React.js, Redux, and TypeScript, resulting in a 25% increase in user engagement.
- Built scalable frontend architecture for SaaS products, including reusable component libraries and standardized design tokens.
- Integrated REST APIs and third-party services for data-heavy lead-generation features, ensuring high reliability and performance under traffic spikes.
- Optimized application performance by refactoring legacy code and implementing lazy loading, reducing page load time by 40%.
- Collaborated with distributed teams across time zones using Git, GitHub, Slack, Jira, and Zoom to deliver high-quality features on schedule.
- Implemented SEO best practices on the company's main website, achieving a 15% improvement in organic search rankings.
- Worked with basic Node.js scripts for build automation and minor backend tasks alongside the core frontend development workflow.

KEY PROJECTS

Rdeens Technologies Corporate Platform

2024 – Present

<https://rdeens.com>

- Built the full corporate web platform from scratch using Angular, TypeScript, and Bootstrap with REST API integrations, scalable routing, and CI/CD deployment.

Elite High School – Educational Management Platform

2025

<https://darkgrey-ram-883123.hostingersite.com/>

- Built a full-featured school management platform handling student admissions, academic records, and administration using .React, Tailwind and REST APIs.
- Delivered a responsive, accessible UI with role-based dashboards for administrators, teachers, and students.

Animal Feed Management Application

2023

<https://animal-feed.netlify.app/>

- Developed a specialized web application for managing animal feed data, tracking livestock nutrition, and monitoring health records using React.js and Bootstrap.
- Deployed on Netlify with optimized performance, clean data tables, and a responsive layout for field use on mobile and desktop devices.

Jeddah Towing Services – 24/7 Roadside Assistance Website

2024

<https://jeddah towing services.com/>

- Built a professional bilingual (Arabic/English) business website for a 24/7 roadside assistance and car towing service in Jeddah, Saudi Arabia, using HTML5, CSS3, JavaScript, and Bootstrap.
- Implemented SEO best practices, Google Maps integration, and a mobile-first responsive design optimized for local search visibility.

EDUCATION

Bachelor of Science in Computer Science

Virtual University | Chiniot, Pakistan

GPA: 2.7 / 4.0
